

# Managing Trust for Industrial Control Systems

---

Ludwin Fuchs

Co-Founder and Principal Engineer, Asguard Networks  
[fuchs@temperednetworks.com](mailto:fuchs@temperednetworks.com)

# Infrastructure Challenges

Designed for safety,  
not security

Standard applications,  
OSes seldom patched

Susceptible to a  
variety of attacks

Lack forensic  
capabilities

Logging for operations,  
not communication

# Goal: Integrated ICS & IT Intranet

## INSECURE CONNECTIVITY

## IDEAL INTEGRATED ICS AND IT INTRANET

# Integration Drivers

- **Geographically dispersed systems**
- **Responsiveness**
- **Business agility**
- **Cost savings**
- **Compliance**
- **Security**
- **Safety**

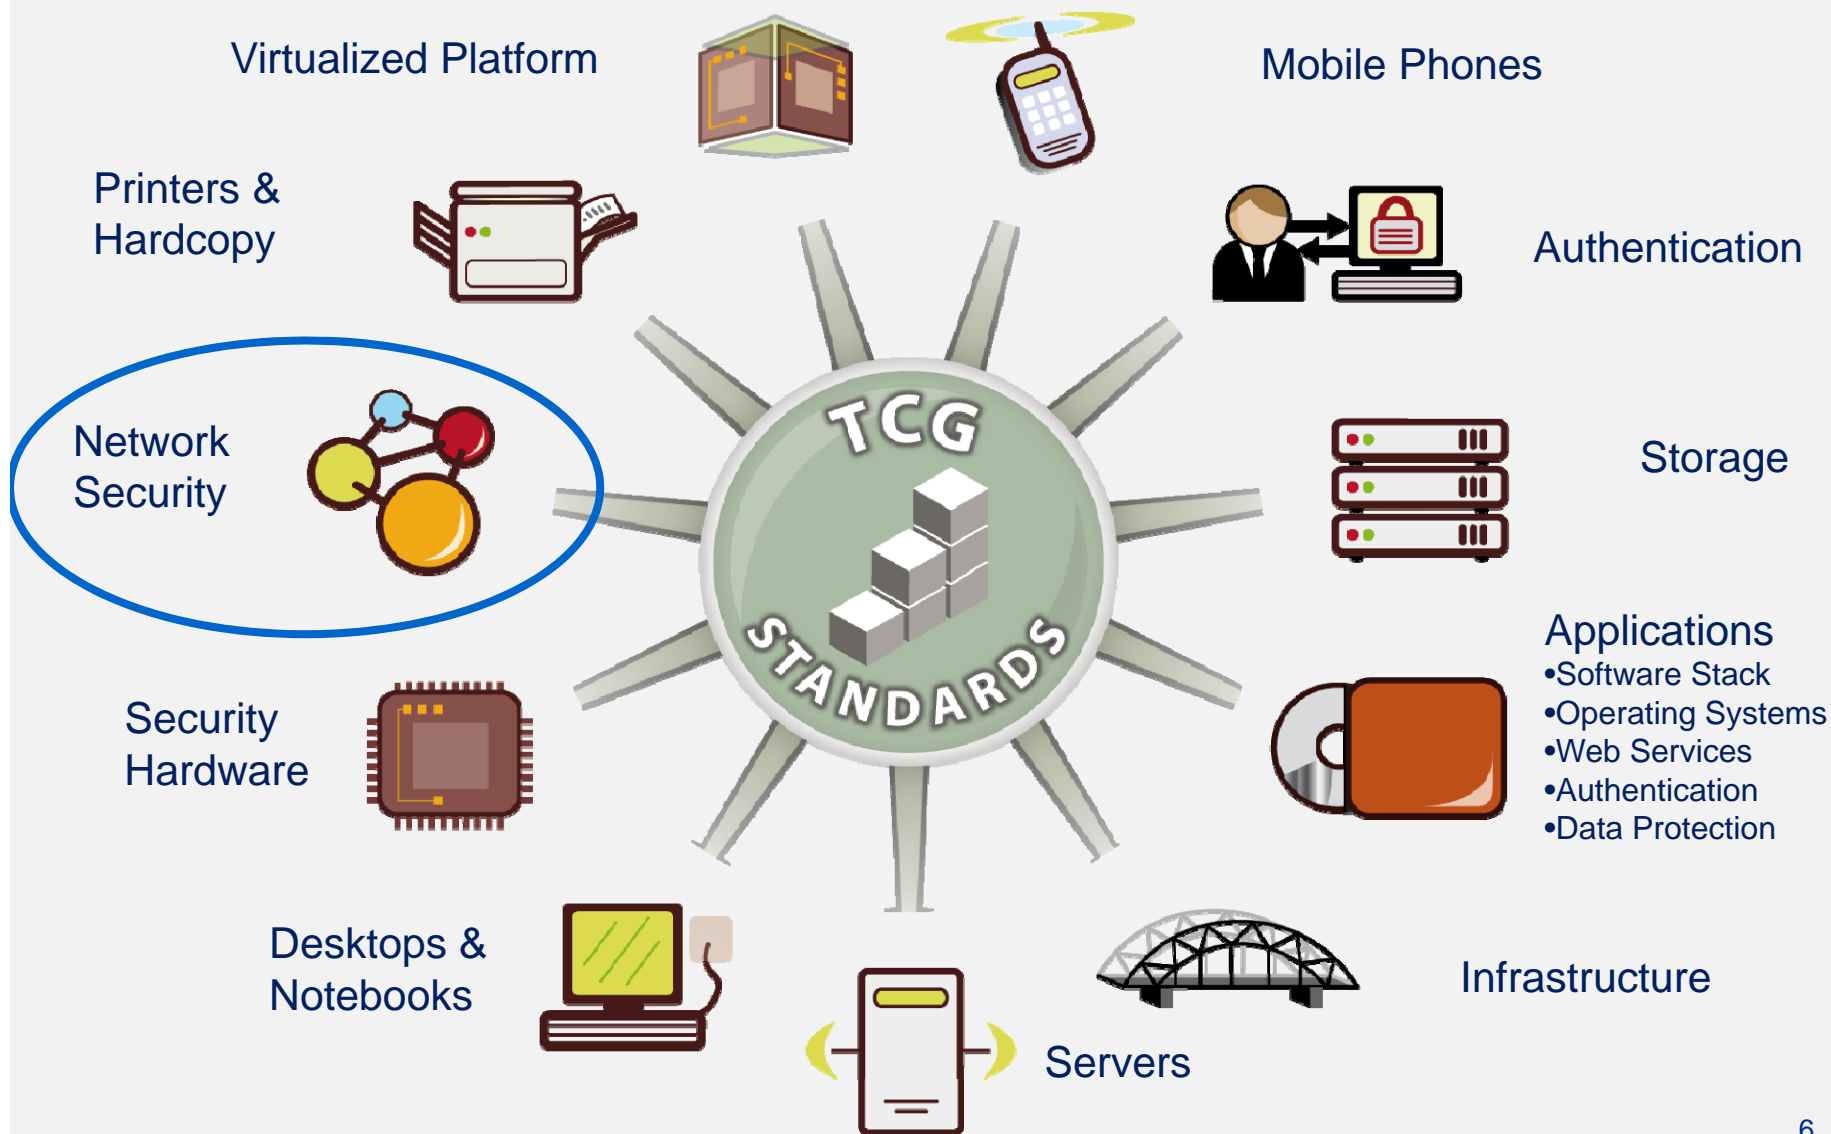

For a customer POC, you will receive a license valid for 30 days.  
For internal Juniper use, you will receive a license valid for 90 days.

# TCG: Standards for Trusted Systems

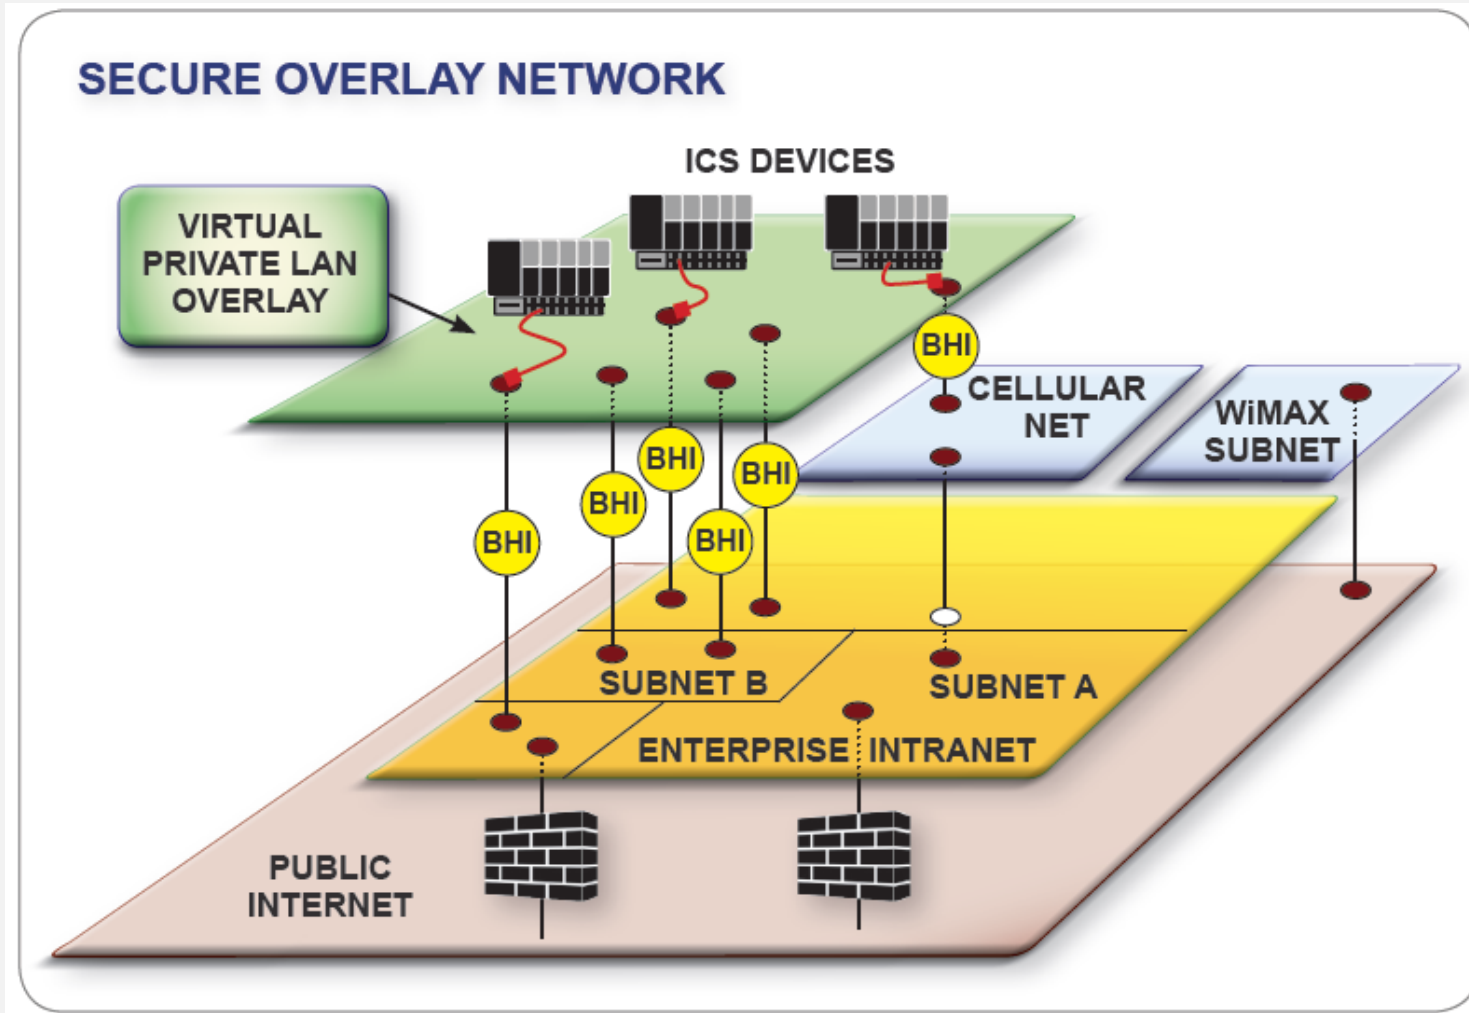

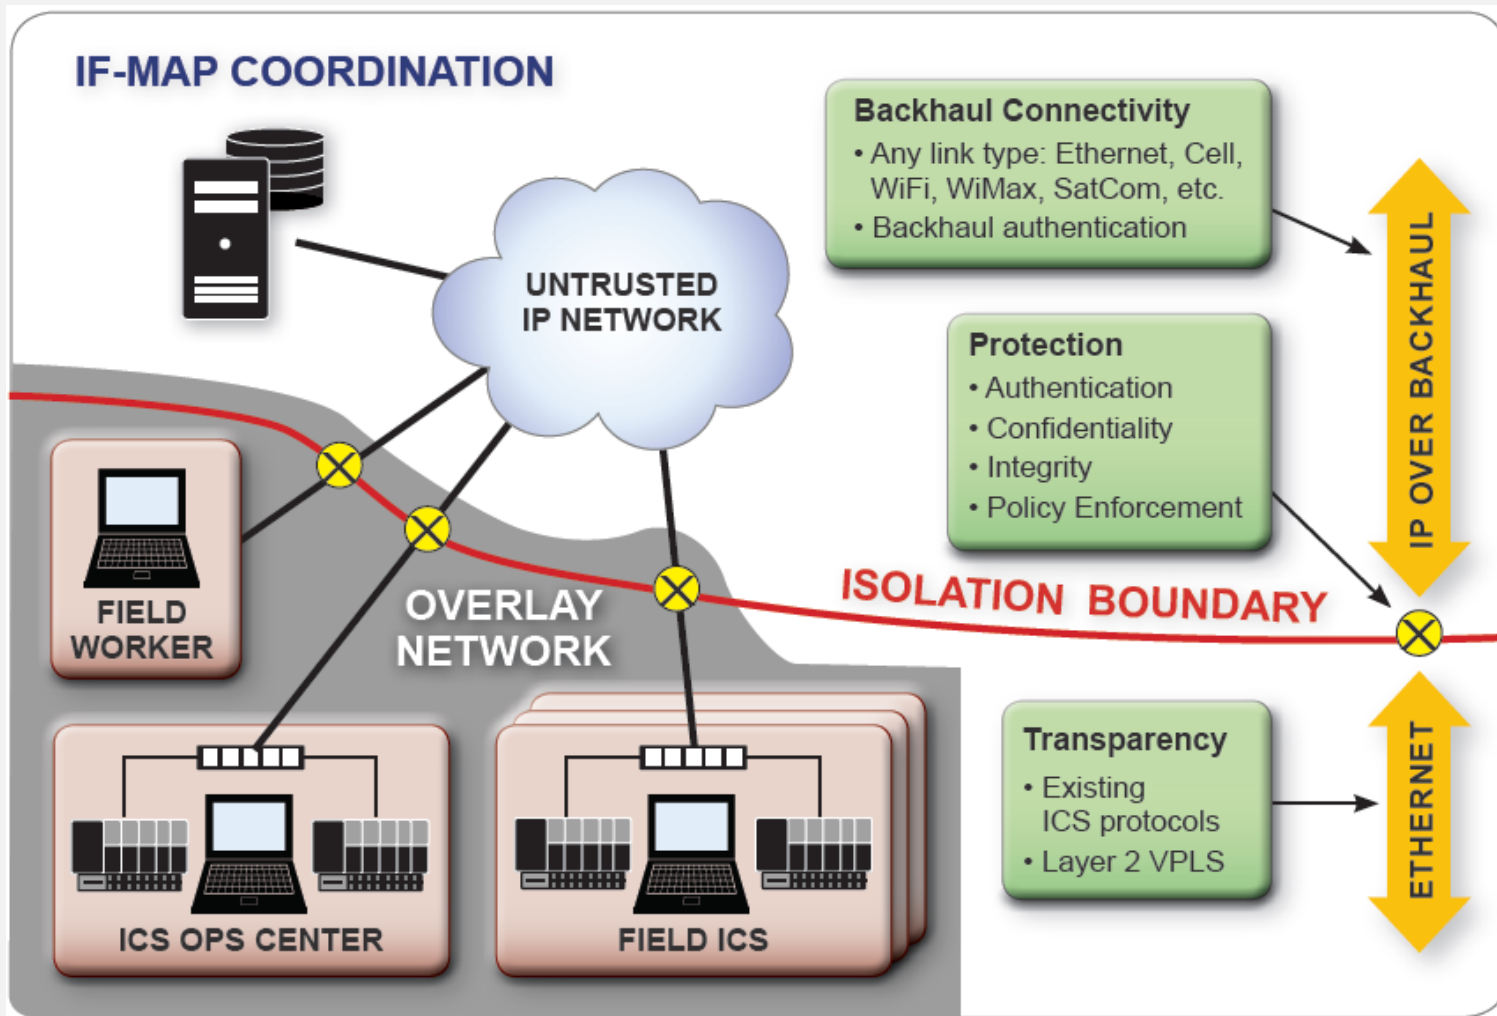

# Trusted Network Connect

- **Open Architecture for Network Security**
  - Completely vendor-neutral
  - Strong security through trusted computing
  - Original focus on NAC, now expanded to Network Security
- **Open Standards for Network Security**
  - Full set of specifications available to all
  - Products shipping since 2005
- **New Standard for Industrial Control Systems**
  - Aligns with ISA100.15 Backhaul Network Architecture
  - Aligns with IETF standards for PKI and identity-based comms

# Solution: Secure Overlay Network

## Next Steps and Call to Action

- Read the ICS Security Using TNC Technology Architects Guide: <http://bit.ly/HQsqaT>
- Design ICS security solutions customized for your unique environments.
- Contact vendors and insist on acquiring TCG-certified ICS security solutions based on the TNC and ISA standards.
- Deploy solutions in pilot first, observe and correct issues, then deploy into production.
- For more information on TCG technologies and architects guides, visit [www.trustedcomputinggroup.org](http://www.trustedcomputinggroup.org)
